

# Fine Needle Aspiration (FNA) Biopsy Needles

Our traditional FNA biopsy needles harvest aspirate for cytological evaluations or specimens for histological evaluations.

## Other features include:

- Each needle has numerically ordered centimeter markings on the outer cannula to provide reference for depth placement
- Needles feature an adjustable needle stop which allows the user to restrict forward movement, localizing the needle tip to the biopsy site
- Color coded stylet hubs indicate gauge size of needles
- Available in a variety of gauge sizes and centimeter lengths
- Available with an echogenic tip on the outer cannula to promote accurate placement under ultrasound guidance

## Chiba Biopsy Needles

Product Code	Length	Description	Units per Box
MCN1803	18G x 9cm		10
MCN1803US	18G x 9cm	with echogenic tip	10
MCN1806	18G x 15 cm		10
MCN1806US	18G x 15 cm	with echogenic tip	10
MCN1808	18G x 20 cm		10
MCN1808US	18G x 20 cm	with echogenic tip	10
MCN2003	22G x 9 cm		10
MCN2003US	22G x 15 cm	with echogenic tip	10
MCN2006	20G x 15 cm		10
MCN2006US	20G x 15 cm	with echogenic tip	10
MCN2008	20G x 20 cm		10
MCN2008US	20G x 20 cm	with echogenic tip	10
MCN2203	22G x 9 cm		10
MCN2203US	22G x 9 cm	with echogenic tip	10
MCN2206	22G x 15 cm		10
MCN2206US	22G x 15 cm	with echogenic tip	10
MCN2208	22G x 20 cm		10

MCN2208US	22G x 20 cm	with echogenic tip	10
